

## Description

- Real-time process tracking and analysis for manual assembly processes and machines without data acquisition interfaces
- Wireless multi sensor packages can be mounted flexibly to tools, parts and technical appliances
- With the interactive labeling tool AnnotationAssistant online training for process recognition can be carried out simultaneously to the production process
- Detailed KPI calculation for automated disclosure of optimization potential

## Change in Work

- Flexible ad-hoc process analysis for data driven decision making processes
- Assembly workers and process planners can monitor processes unaffiliated
- Enabler for data driven process analyses without the need of expert knowledge (Citizen Data Scientist)

## Contact

**Emir Cuk**

Factory planning and production management  
Fraunhofer IPA  
Nobelstr. 12, 70569 Stuttgart, Germany

Tel: +49 711 970-1911

## Added value & benefits

- Create transparency without existing data gathering infrastructure, even in manual processes
- Automated and flexible process tracking
- Detailed Prozessanalysis via Dashboard and KPIs
