

## Description

- Direct connection of image processing systems (BV) to mobile devices
- Access to real-time information directly from the plant
- Display and evaluation of error statistics
- Framework parameters of the test system can be displayed, adjusted and directly imported back into the test system
- Measurement images and test results can be commented and forwarded to the responsible persons

## Change in work

- Monitoring and inspection of BV plants without having to be present at the system
- Faster reaction to error conditions
- Improved communication with responsible persons via visual feedback possible

## Contact person

### Dipl.-Ing. Bernd Bieberstein

Optical measuring and testing systems  
Fraunhofer IPA  
Nobelstrasse 12, 70569 Stuttgart

Phone: +49 711 970-1887  
bernd.bieberstein@ipa.fraunhofer.de

## Added value & benefits

- Savings through shorter reaction times and thus avoidance of rejects
- Simpler BV-System construction possible, since monitors and keyboards are no longer absolutely necessary
- Easy to integrate into existing environments
