

# Co-Creation Workshop on the work of the future

## Focus topics and contentExpected findings

- Co-creation and agile approaches in an exercise on 2 selected topics of the FWL:
  - Designing digital assistance systems in production
  - Developing solutions for the attractive production work of the future

## Workshop format

- 1-day workshop for small groups
- Impulse for co-creation
- Running through a Design Thinking development cycle on Example of projects for the work of the future.
- Interactive exercise as learning by doing
- Retrospective to perpetuate what has been learned

- Development of methodological knowledge and creativity techniques
- Systematic generation of solution ideas and prototypes
- Successful cooperation in development projects
- Exchange of experience on the procedure and transfer to the own working environment

## Objective

- Introduction and communication of co-creation approaches
- Implementation of a design thinking cycle
- Getting to know questions and solution areas for the work of the future
- Illustration of the solution idea as a prototype
